Iris Gardens**

Hutchinson, Kans.

H. H. Banyard

Greetings 1955

We are very late with our catalog this year and some day we may have to quit teaching school to take care of the increased volume of iris sales. We do thank you for your confidence in us and we will do our best to furnish good stock at reasonable prices. Each passing year brings us a new meaning of beauty, and our philosophy of life grows richer as we work with children and flowers. They are so much alike—they will grow and bloom if they receive affectionate care.

We have again added many of the newer varieties to our list this year, and we almost regret that many of the older kinds must make way for them. We are located just a mile south of Hutchinson on Highway 17. Our blooming season reaches its peak about May 15, and we believe you will find our iris (2 acres) and peony (4 acres) gardens worth including in a tour of Kansas gardens. Our soil grows good roots and we insist that our customers are satisfied or we make adjustments.

Happy gardening to you! We offer this list as one garden lover to another, knowing that you will find, as we have, the peace and relaxation that comes from adding new beauty to your garden and home.

ACCREDITED JUDGE OF AMERICAN IRIS SOCIETY

CULTURE

It is a mistake to assume that because iris are extremely hardy that they will not respond to a careful cultural plan. Above all, iris must have full sun and good drainage—given such conditions many of your iris troubles will be averted. Keep all dead leaves and litter removed—these breed disease. Iris will thrive in any ordinary garden soil. A good plan for the fertilizing of iris is to apply gypsum or lime in the spring, superphosphate after blooming, and a feeding of bone-meal in the fall. Larger blooms and more vigorous plants will be your reward.

GUARANTEE

All our stock is state inspected and we guarantee to supply clean, healthy roots, true to name. Adjustment will be made wherever any dissatisfaction occurs.
